UN Archive

*"Following the completion of the UNPA archives auction I would like to take this opportunity to thank you for your company's professional handling of the auction and making it a great success for the UN organization."*

Robert Gray  
 UNPA, New York

United Nations Art and Archives  
 Lots 1 to 8 Realised

**US\$ 3'068'000** as one group

David Feldman sets another new world record - **the highest price ever paid for a large lot.**

live dual auction

*Many of those who attended the sales in person commented that the ability to bid via the Internet has changed dramatically the future of the stamp auction business. "Someone in Guadalajara or Tokyo or Singapore can 'watch' the sale and jump in readily", said one dealer, "So I have to compete more on large lots and mixed lots which are harder to evaluate from the catalogues, rather than against my customers on items for their collections. The electronic connection brings an exciting future to the business."*

# DAVID FELDMAN'S MAY AUCTIONS:

## APPLAUSE AND CHEERS AMID FIERCE BIDDING, IN THE AUCTION ROOM AND VIA INTERNET

With six auction catalogues totalling 20 million Swiss francs (about US \$15 million) in pre-sale estimates, the auctions held May 10-18, 2003 proved to be as dramatic and entertaining as any event in philately. Starting with the sale of the "Irina" Finland on Saturday, May 10th, which brought over 2 million Swiss francs, with buyers in sales rooms set up in Helsinki and Geneva, on the telephones and over the Internet, the stage was set for a week of long hours and unprecedented drama. The sale of the Grand Prix Greece Hermes Heads, in Geneva and Athens simultaneously, brought cheers and applause as lots were hammered down to bidders at many new record prices. The sale of the complete philatelic archives of the United Nations on Monday night was a dramatic confrontation among several buyers who had pre-qualified to bid on the lots as a group, with the entire archive going to Champion Stamp Company with a bid of over \$3 million US dollars, the new world record realization for a large lot at public auction.

Other sessions included an important collection of the First Issues of Mexico; this popular collecting area had the auction room amazed as nearly 30 bidders connected live via the Internet seemed to take the auction over at times, bidding against each other, with the auctioneer and the bidders in the room in Geneva watching in amazement as prices, visible on a projection screen in the room, soared second by second, punctuated by a polite bell announcing each successive bid. Though some lots did go to room bidders or the telephone, the majority of the lots went to the Internet, with sales totalling about 50% over the pre-sale estimates. Similar bidding from Internet clients punctuated the sale of the "Metliss" collections of Great Britain used in British Europe; for the covers from Cyprus, over 20 bidders were connected electronically, and many bid against each other, against a second sales room in London and against the crowd in Geneva, bringing new price levels for many of the top covers. The same pattern held for the sale of the Stevenson Queensland, with bidders from Australia and England represented in the room by auction agents or live on the Internet, or bidding in the parallel London sales room.

The Thursday sale of Destination Mail to and from Ireland, assembled by David Feldman over thirty years, brought many outstanding realizations particularly for items which had not been offered publicly for a generation. Notable among these was the cover illustrated on the front cover of the catalogue, franked by a block of four of the Canada 1857 7 1/2p imperforate, a unique multiple on cover, which brought CHF 425,000, which finds its appropriate home in the Brigham Grand Prix Canada collection. A cover franked with 13 examples of the Great Britain 2p Blue of 1841 including a block of 6 and a strip of 4, the largest recorded franking going abroad, sent from Ireland to Spain, realized CHF 378,000, and a cover from the USA to Ireland with a strip of three 5 cents and one 10 cents of the 1847 issue, brought CHF 248,000 (all prices including commission)

Friday's offer of the "Polaris" collection of Arctic and Antarctic material, the largest such holding in volume and value ever auctioned, brought spirited bidding from both the agents and the Internet against the rest of the auction room. The ever-popular large lots and collections, as diverse a group as has ever been assembled, saw knock-down drag-out bidding on the best lots at very strong levels. The final part of the auction, the "Coubertin" Olympics collection, concluded the sales on Saturday, with stunning price levels being obtained for the rarest items, both in the room and to the Internet bidders. While final figures are not yet tabulated, the total sales are sure to be the largest for any single auction in Europe, and probably the world, for this year and possibly for years to come.

Many of those who attended the sales in person commented that the ability to bid via the Internet has changed dramatically the future of the stamp auction business. "Someone in Guadalajara or Tokyo or Singapore can 'watch' the sale and jump in readily", said one dealer, "So I have to compete more on large lots and mixed lots which are harder to evaluate from the catalogues, rather than against my customers on items for their collections. The electronic connection brings an exciting future to the business."

The next David Feldman Auctions, set for November of this year, are already in preparation, and will contain several important specialized collections as well as general sections of stamps, covers, lots and collections from all over the world. To include your material in these sales, contact David Feldman SA at 175 route de Chancy, 1213 Onex, Geneva, Switzerland or send an email to [admin@davidfeldman.com](mailto:admin@davidfeldman.com), or contact one of the many international representatives.
